Revolutionary flywheel energy storage delivering decades of resilience, instant response, and American-built reliability for critical applications.

Our flywheel energy storage device is built to meet the needs of utility grid operators and C& I buildings. Torus Spin, our flywheel battery, stores energy ...

But in a state-of-the-art facility in Utah, American company Torus is taking a radically different approach: storing electricity in massive steel wheels ...

Discover the power of innovation and collaboration with Xun Power, a leading energy company driving transformative solutions for a ...

Our approach increases strength, rigidity and improves high speed performance. We have incorporated fiber wound rotor fabrication techniques to maximize specific energy, energy density and power density.

First-generation flywheel energy-storage systems use a large steel flywheel rotating on mechanical bearings. Newer systems use carbon-fiber composite rotors that ...

Our hybrid-electric flywheel battery redefines energy storage with extreme durability, high-power input/output, a lightweight and modular design, lower cost of ownership, and unparalleled safety. ...

The Utah-based startup is launching a hybrid system that connects the mechanical energy storage of advanced flywheel technology to the familiar ...

The company is a global leader in energy storage and was one of the first to enter the battery storage market, highlighting its commitment to innovative solutions ...
