---

China leading provider of Solar Slew Drive and Dual Axis Slew Drive, Changzhou Hangtuo Mechanical Co., Ltd is Dual Axis Slew Drive factory.

The Automatic Sun Tracking System maximizes solar energy output by intelligently adjusting panels to follow the sun's path, increasing annual power generation by ...

The automatic adjustment device has advantages of simple structure and high pertinency. The sunlight intensity can be monitored automatically and thus the angle of the solar panel can be...

Capture every beam of light and increase effective light time: The solar tracker combines dual-axis drive and sensitive sensors to realize 270° accurate tracking of the sun, capturing every beam of light and ...

The fully automatic solar tracking bracket has a sensor controller and driver set to track the position of the sun to ensure that the solar panels are always facing the sun to maximize power generation.

We designed and built a system to automatically orient a solar panel for maximum efficiency, record data, and safely charge batteries. Using a GPS module and ...

This sophisticated mounting solution integrates advanced servo motors, precision sensors, and weather-resistant components to create a self-adjusting platform that continuously optimizes solar panel ...

Our enhanced open-loop solar tracking system integrated with satellite compass combined with inclinometer, which offered a reliable data for determining the system heading and solar position.

Solar trackers are designed to optimize the angle of solar panels, ensuring they receive maximum sunlight throughout the day. Unlike fixed-tilt solar panels, which remain in a stationary position, ...

# Automatic outdoor solar integrated machine with multi-angle adjustment

Automatic Rotating Dual Axis Solar Panel Tracking Mount. Dual axis solar tracking can rotate direction of horizontal and vertical.
