That isn't exactly accurate. The estimate shows you how long your base will be powered based on the current power draw, but when you reduce the power draw it doesn't "extend" the time, it ...

Next, make sure the phone is placed in the base for at least 5 minutes to reset its connection to the base, and then try placing a call after. If the ...

In the event that you lose power, your Base Station has four (4) NiMH (nickel-metal hydride) rechargeable batteries that can keep your system powered for up to 24 hours. During this time, you'll ...

For some reason the base station requires so much power for usb that if you have a bunch of usbs plugged into your computer even with them not being maxed out it can cause some ...

GMRS, HAM, and even simple NOAA radios can keep you connected, coordinated, and informed -- but only if you prepare in advance. ...

You could either buy just an AC adapter, on the basis that if that doesn't fix it the base itself is dead. Or buy a complete unit, identify what's broken & resell the rest for spares.

After 15 minutes, the Base Station will continue to monitor your sensors and send alarm signals, but will shut off any other features to preserve battery life. Depending on your usage, there is enough battery ...

After power came back was unable to restart base station remotely. Please help. My power went off 7 times between Friday night and Saturday morning and the base came back up each ...
