CHAM has been focus on new energy core technology for 20 years, providing customized products and services to customers with its professional pre-sales and R& D teams.

By submerging battery cells in a non-conductive coolant, this system ensures exceptional safety and precise temperature control, maximizing the performance and lifespan for energy storage. This ...

Energy storage technologyis gradually developing in the direction of large capacity and high energy density, so the integration of battery modules in the cabinet is getting higher and higher.

Utilizing innovative liquid cooling technology, this system effectively controls battery temperature for enhanced efficiency and safe energy storage operation, making it ideal for environments requiring ...

HJ-G65-261L and HJ-G130-261L are two 261KWh outdoor cabinet energy storage systems with liquid-cooling technology, designed for outdoor energy storage needs, suitable for a variety of application ...

Equipped with an independent liquid cooling system, it achieves higher energy density and enhanced heat dissipation within a compact footprint, while offering ...

? Solar + Storage Ready - The cabinet seamlessly integrates with rooftop or ground-mounted PV systems, enabling: Maximum solar self-consumption Reduced grid export limitations Higher overall ...

Designed for commercial and industrial applications, this 261kWh energy storage cabinet integrates cutting-edge 314Ah LiFePO4 battery cells with a high-performance liquid cooling system to achieve ...

The energy storage system utilizes lithium iron phosphate batteries, which offer high energy density and long cycle life. The unit features an outdoor cabinet design, allowing for flexible expansion and ...

Cabinet energy storage system immersion water cooling device

Our liquid-cooling energy storage cabinet is engineered for high-efficiency, scalable ESS solutions. It combines top-tier LiFePO4 cells, advanced liquid cooling, and ...
