Feb 2, 2026; Wind energy generation varies by state. Discover the states with the most ...

Local restrictions have made it harder for wind companies to find places to build even as the U.S. has committed to tripling renewables by 2030 in order to do its part in addressing climate...

The utility announced Tuesday that it will sell off its wind farms, natural gas plants and power infrastructure in Washington to Portland General Electric for \$1.9 billion. PacifiCorp operates in ...

Overview United States Energy Legislative History Wind Production Tax Credit (PTC) State Policy Tax Credits Renewable Portfolio Standards (RPS) Grant Programs Permitting and ordinances Renewable energy policy gained interest after the oil shocks in the 1970s and environmental concerns because it offered diversification in the US energy portfolio Energy Policy and Conservation Act (P.L. 94-163). Wind energy was among the renewable energy options incorporated in energy policy beginning in the 1970s and continuing into the present day. The growth in wind energy can largely be accredited to the public policy's providing incentives and technological advances, making wind energy one of the fe...

Can wind power be sold to the state

We calculated restrictions on wind and solar energy projects by looking at the restrictions states and counties imposed on their development.

U.S. Department of Energy's Annual Wind Technologies Market Report reviews the price of wind power in the U.S. and describes trends in ...
