-----

Over 600 GWh of energy storage is expected to be installed by 2030. Two-thirds of all utility-scale energy storage capacity installed in 2025 was built in states won by President Donald ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

The U.S. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite ...

Total installed utility-scale energy storage capacity in the United States reached 137 GWh by the end of 2025. Commercial and industrial systems accounted for 19 GWh.

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

The US installed a record 28 GW/57 GWh of BESS in 2025, marking a 29% YoY increase, according to SEIA and Benchmark Mineral Intelligence report Out of the total annual installations, ...

Specifically, there are plans to install 6.3GW of energy storage between August and December 2023, contributing to an expected annual ...

From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar and storage transition from the electric grid's fastest-growing additions to its ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects ...
