Using our proprietary intelligent monitoring system, we track real-time performance metrics such as energy storage levels, power generation, and equipment health.

Rugged Monitoring's electrical asset condition monitoring systems understand the stress and strain placed on renewable energy applications, delivering effective ...

This study demonstrates how the random forest machine learning classifier can be used to monitor and categorize the performance of solar PV plants to ensure their reliability and efficiency.

A one-stop data platform with information across India's climate, energy, economy and environment contours.
