---

Led by Oracle Power and Kaheel Energy, this project will see the development of a 1.3 GW renewable energy hub which will produce 55,000 tonnes of green hydrogen using 400 MW electrolyzers.

The Asia Pacific faces a challenging energy transition, requiring efficient and available solutions like solar and wind, not hydrogen.

Low-emissions hydrogen production projects have gone from just a handful of demonstrations to more than 200 committed investments for projects that are increasing in number and in scale, reflecting the ...

Despite the enormous potential of hydrogen technologies to decarbonize hard-to-abate industries, improve energy security, and enhance grid flexibility, their implementation remains limited, although ...

The proportion of hydrogen filling stations already in operation in East Asia continued to rise. At the end of 2024, there were 748 hydrogen filling ...

The Asia Pacific region had the largest number of hydrogen refueling stations in operation, accounting for 64% of the global total - 97% of which were located in ...

In South Korea, 198 refuelling stations were in operation and in Japan it is possible to refuel vehicles at 161 locations. Outside of China, South ...

China has the greatest number of hydrogen fuel stations of any country worldwide. As of August 2025, there were \*\*\* operational hydrogen ...

Only& #32;36& #32;green hydrogen projects, which use electrolysis powered by renewable energy to separate hydrogen from oxygen in water, are currently operational in the region; the majority are in ...

# How many hydrogen energy stations are there in South Asia

Asia leads by a wide margin, boasting 748 active stations. China accounts for the largest share at 384, followed by South Korea with 198 and ...
