-----

About this data Total solar capacity Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated ...

Global solar photovoltaic capacity has grown from around 40 gigawatts in 2010 to approximately 2.2 terawatts in 2024. Only in that last ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Global Solar Power Plants There are currently 10,550 Solar power plants across the globe with a total capacity of 186242.0 MW.

What is the capacity of solar energy? The world's current solar energy capacity is 850.2 GW (gigawatts). This is the maximum ...

We've looked at the 15 biggest solar farms in the world right now, examining capacity, total investment, and the future of solar power ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that ...
