Biofuel generator requires shelter so it's been getting destroyed by the weather. Best to bring a couple of wind turbines for your deep mining needs. Biofuel generator will still work great in ...

The Sailwind 4 project at Konstanz University of Applied Sciences aims to use old windmills for sustainable power generation. igus supports the ...

Two complementary propulsion systems have been developed that are fully automatic and fully adjustable to adapt to any wind situation. They enable fuel ...

Students from HTWG University of Applied Sciences in Konstanz, Germany, are converting these ancient windmills with high-tech components to ...

High-tech meets nostalgia: the HTWG Konstanz's Sailwind 4 project aims to use old windmills to generate sustainable electricity. igus is supporting ...

Strong temperature fluctuations, high wind loads, turbulence, sandstorms: wind turbines must function reliably in harsh weather conditions. igus® offers you a ...

igus® offers many solutions for wind turbines as well as for the associated equipment used in production, transport and installation.

Long service life despite dirt, wind and severe temperature fluctuations: secure bearing technology and energy supply for solar plants, wind turbines and more.

In addition, they are easy to fit and are UV resistant. According to the experience of Heyde, the igus bearings ensure the tipping function even in extreme storms with over 150 km/h wind speed.
