We're excited to announce that Statkraft will manage and optimise over 68 MW of stand-alone battery energy storage projects in Ireland!

Learn how EPC contractors can choose a reliable C& I energy storage supplier using a practical checklist covering engineering, EMS/BMS capability, safety, and lifecycle risk reduction.

Building a next-generation player in the Irish power market, HitecVision and Reinova Partners have started to build an experienced ...

Plan will transform how we use materials and resources, cut waste, boost productivity, and create sustainable jobs in every part of our country. The department is responsible for the delivery of ...

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

This article explores how Energy Storage Systems (ESS) solve the fundamental flaw of solar energy--its lack of synchronicity with demand. We will dive into the technical architectures of ...

EirGrid is Ireland's TSO, which stands for "Transmission System Operator". We plan, manage and develop Ireland's high-voltage electricity grid for a sustainable ...

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies have been ...

Fluence is a global market leader in energy storage products and services, and cloud-based software for renewables and storage assets.

Irish Energy Storage Power Station Management

The plans are for the construction and operation of a 50MW "long duration" energy storage facility at the site of the former Barry power station. The application reads: "The rationale for ...
