Following is a list of Power Plants Listed in alphabetical order. Please use the filters on sidebar to refine the list based on technology used by the power plant and ...

CaO/CaCO₃ thermochemical heat storage has been considered as a competitive technology in concentrated solar power plants. Carbide slag and red mud are solid wastes from the ...

On this page, you can explore our database of solar projects in California. Each month, we track projects in development and update our list of the largest solar ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

Country Acres is a solar and battery energy storage project connected to SMUD's grid.

Therefore, in this study, we present a novel techno-economic analysis of an 800 MWh CaCO₃/CaO-based TCES system integrated with concentrated solar power plant (CSP).

Fresno County's west rural communities of Cantua Creek, El Povernir, and Five Points are at the epicenter of California's clean energy ...

Utility-scale solar power capacity in China reached more than 880 gigawatts (GW) in 2024, according to China's National Energy Administration. China has more utility-scale solar than ...
