-----

Based on elastic load research, a coordinated dispatch method of adjustable active distribution network with intelligent load based on convolutional neural network (CNN) is proposed.

The 50kW108kWh C& I Energy Storage System supports core functions including peak shaving and valley filling, demand side response, emergency backup power, solar self-consumption optimization ...

In this regard, the World Bank funded a project for assessment of power generation sector and identification of clean energy development strategies for Kazakhstan.

This article explores key applications, market opportunities, and innovative solutions shaping the sector - essential reading for project developers, policymakers, and energy professionals.

At the end of 2024, the Kazakh government launched a national project to modernize the energy and utility sectors and address long-standing ...

The most widely recognized solution to this issue is the implementation of energy storage systems (hereinafter - ESS), which are designed to accumulate electricity and release it ...

Clearbrook will provide technologies for energy storage and virtual power plants, while AG-Tech will ensure localization and integration of digital energy management systems.

Beyond infrastructure development, the Project will demonstrate grid stability solutions for large-scale RE integration while supporting policy frameworks for ...

With Kazakhstan targeting 50% renewable energy by 2050, the Energy Valley initiative has become the testing ground for innovative storage solutions. But here's the catch - how do we ensure these high ...
