US battery storage hits record 5.6 GW in Q2 2025, led by utility-scale growth, but sourcing rules may slow future gains.

The report includes comprehensive analysis of deployment trends, market sizing, and growth projections for utility scale and behind the meter segments, in addition to an energy storage ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest ...

China, which produces over three-quarters of batteries sold globally, has played a crucial role in the energy storage boom. Chinese companies, supported by state backing, have brought ...

After record growth in 2024, U.S. battery energy storage systems (BESS) could grow from more than 26 gigawatts (GW) of capacity--enough to ...

From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar and storage transition from the electric grid's fastest-growing additions to its ...

LFP batteries are fuelling a boom in energy storage projects that - in percentage terms - now outpaces electric vehicle sales growth. UBS bank ...

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

US developers of large-scale battery storage stations have 18.7 GW of new capacity under construction, according to S& P Global Energy Market Intelligence data, indicating another ...

Large-scale energy storage projects boom

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...
