-----

Lava is a climate-tech startup turning breakthrough isothermal heat-engine and heat-pump R& D into real-world megawatts. Our systems pair record thermal efficiency with factory-ready ...

This isn't sci-fi - it's the Lava Tower Solar Power Station rewriting the rules of renewable energy. Forget those flat solar farms you've seen; we're talking about a vertical power plant that doubles as an ...

Active volcanoes are proving to be a hot commodity in the global race to transform to renewable energy as regions all over the world that reside near these natural wonders work to ...

Repsol Renewables is developing a 500 megawatt (MW) wind and a 450 MW solar project in Apache County, Arizona. Once operational, the projects would ...

Lava Solar Thermal Power Plant employs a cutting-edge technology called Concentrated Solar Power (CSP). Thousands of mirrors, strategically positioned, focus sunlight onto a central tower, where a ...

With 12,000 mirrors, China's largest molten salt solar thermal power station in the Gobi Desert can reduce annual carbon dioxide emissions by 350,000 tonnes, equivalent to afforesting ...

Engineering Marvel, Chinese lava tower solar thermal power plants where mirrors reflect the sunlight to tower head to produce electricity form heat, ...

The facility is touted as being the first solar power plant that can store more than 10 hours of electricity, which translates into 1,100 megawatt-hours, ...

Photothermal power generation is a kind of grid-friendly new energy generation form. Because of its energy storage function, it plays a very good role in transl

The Andasol Solar Power Station, Spain, uses a molten salt thermal ...
