In this paper, a self-balanced battery charger by combining the PSFB converter with the CDR rectifier and a voltage multiplier circuit for lithium-ion batteries has been proposed.

HAWKER modular, high-frequency battery chargers offer advanced scalability, redundant power, simplified service, and maximum flexibility to enhance customer operations.

Explore reliable lithium battery chargers with advanced safety and protection features. Charge and maintain batteries for cars, motorcycles, boats, and more.

High quality, efficient, easy to program, all at a great price. This High Frequency charger has built in multi-voltage capability. Ideal for all applications.

Ideal for energy storage applications, this charger supports intelligent, high-frequency charging to optimize battery life and performance. Perfect for industries such as energy storage, manufacturing, ...

The ICL Series are reliable, compact, rugged, automotive grade chargers that are enhanced to charge 9S to 34S lithium battery packs optimizing battery life and ...

High-frequency chargers operate at frequencies above 20 kHz - 40 times faster than standard wall outlets - using gallium nitride (GaN) semiconductors and pulse-width modulation ...

A 24V high-frequency lithium battery charger is an advanced charging device designed to efficiently charge 24-volt lithium batteries. It uses high-frequency switching technology, offering ...
