One of the more studied manganese oxide-based cathodes is LiMn_2O_4 , a cation ordered member of the spinel structural family (space group $\text{Fd}\bar{3}m$). In addition to containing inexpensive materials, the three-dimensional structure of LiMn_2O_4 lends itself to high rate capability by providing a well connected framework for the insertion and de-insertion of Li ions during discharge and charge of the battery. In particular, t...
