With Tesla's Gigafactory expansion into northern Mexico and increasing investments in renewable energy storage, Monterrey's lithium battery production capacity could triple by 2027.

Peak Energy just switched on a 3.5 MWh sodium-ion battery, the largest sodium-ion energy storage project developed in the US. The system is the first of its kind at grid scale, and may eventually be a ...

Cenntro Automotive Mexico, an importer and distributor for the New Jersey-based electric vehicle manufacturer Cenntro Electric Group, will make ...

As factories and tech parks expand across Nuevo Laredo, reliable energy storage systems have become as crucial as the city's famous mountain water reservoirs - both storing vital resources for controlled ...

Dong Li (pictured) revealed to Batteries International on September 18 that the new plant will be in Monterrey, in northeastern Mexico. He said ...

Summary: The newly operational Monterrey Energy Storage Power Station positions Mexico as a leader in grid-scale battery storage solutions. This article explores its technological innovations, ...

The company has focused its investments on lithium-based battery production due to its energy storage capacity, despite higher costs and environmental considerations.

Mexico's push to secure Made-in-Mexico batteries for its cars is confronting a hard truth: no lithium has yet been mined in the country, leaving automakers wary of gridlock in supply.
