From small commercial facilities to large-scale industrial operations in Lebanon, our battery storage and microgrid systems are designed to scale with your needs.

Looking ahead, Abdelnour describes an AI-driven microgrid design platform under development at LEAPS. The tool aims to reduce design timelines from months to significantly shorter ...

The following is a presentation of the design and implementation of a Smart Microgrid system specific for supplying telecommunication Base Transceiver Stations (BTS) with power in the context of an ...

The objective was to expand the genset-powered plant in the village of Baabdat, Lebanon, into a microgrid that would save fuel and provide reliable power for more than 100 residential units, a clinic ...

Three distinct scenarios have been investigated, among them non-renewable and renewable analysis with regards to environmental and economical conservations starting with a purely diesel generator, ...

This 'Smart Grid' ensures a continuous and reliable power supply throughout the year, eliminating any instances of blackout. Our scope of work encompasses the ...

It will be conducted under the prevailing situation of massive private power supply service providers operating expensive diesel generators and in light of the developed national energy policy that ...

This paper suggests the design and analysis of a 1.5MW microgrid of a typical village in Lebanon that makes the use of a hybrid generation and automation technology as efficient way to solve all ...

These guidelines are designed as a transitional framework to help municipalities, cooperatives, and local actors establish small-scale energy communities and micro-grids until the national grid is fully ...
