Last year, the electric power sector added a record 37 GW of solar power capacity to the electric power sector, almost double 2023 solar capacity additions. We forecast wind ...

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

In 2024, net solar power generation in the United States reached its highest point yet at 218.5 terawatt hours of solar thermal and ...

Data was obtained from various sources, including an IRENA questionnaire, official national statistics, industry association reports, consultant reports and news articles.

Nearly 250 GWdc of solar will be installed from 2025-2030, but the sector has more potential Despite the changing market and policy conditions that the solar industry has faced ...

About this data Electricity generation from solar power Measured in terawatt-hours.

Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy ...

This article compiles U.S. solar industry statistics, covering capacity generation, installed megawatts, employment figures and future ...

This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends

National statistics on solar power generation

and business ...
