Our Solar Walkway is a smart data floor designed to promote renewable energy in the public domain. The floor is installed in urban environments to make the ...

Onyx Solar revolutionizes sustainability with an advanced photovoltaic walkable floor, seamlessly integrating renewable energy into functional surfaces.

PV Floor provides both energy saving and an aesthetic solution with its innovative energy-generating solar panels used as floor covering. With its durable and ...

Each model features specific power outputs, efficiency rates, dimensions, and temperature coefficients, suitable for different installation needs and operating conditions, ensuring versatility in solar energy ...

Unlike traditional PV panels that occupy valuable rooftop space, our PV floor offer a dual purpose, allowing building owners to harness solar ...

To find more possible areas for solar power generation, this research project is conducted to explore the possibility of installing PV panels on pavements and cycling tracks, so that part of the ...

The PLATIO solar paver is an innovative, energy-generating paver with an in-built solar panel. It is a double green, sustainable building material, as it not only ...

PVFloor provides both energy saving and an aesthetic solution with its innovative energy-generating solar panels used as floor covering. With its durable and efficient structure, PVFloor can be used in ...

As an innovative application of BIPV, photovoltaic floor tiles seamlessly integrate with ground landscape designs, serving as both decorative materials and green energy carriers. They ...
