In this video, I walk you through my complete DIY power bank build featuring a massive 280Ah battery capacity and solar-ready design.

Ironridge Components Assembling The Ground Mount Frame Installing Solar Panels Beware The Purchasing Process on Alibaba Booting For The First Time Rec Bms Settings Victron Color Control GX Settings Generator Input & Charging Grounding 120V Power With the frame in place, it was time to install the other IronRidge pieces. Their rails are the centerpiece of the system - we went with the XR1000 which is rated for heavy loads and high winds. Since our panels were 6 across and 5 down, we needed 12 rails (one on each side of each array). Here's a visual. These rails are held on by Rail Connectors...
