Learn how residential solar power works, why costs are falling worldwide, and how to calculate your payback period with clear examples and real data.

Year-end wrap-up Following 35% growth, solar has passed hydro on US grid Coal makes a bit of a comeback, if only by accident.

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.
