Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy Information ...

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

According to our Electric Power Annual, solar power accounted for 3% of U.S. electricity generation from all sources in 2020. In our Short-Term ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

In 2024, 24 states and territories generated more than 5% of their electricity from solar, with California leading the way at 32.4%. The United States installed approximately 31.1 GWh (12.3 ...

The SEIA report tallies all types of solar energy, and in 2007 the United States installed 342 MW of solar photovoltaic (PV) electric power, 139 thermal ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...
