The three major categories of energy for electricity generation are fossil fuels (coal, natural gas, and petroleum), nuclear energy, and renewable energy. Most electricity is generated ...

Employing a combination of energy efficiency and renew-able energy sources--including wind, solar, geothermal, small hydro, biomass, and ocean power--can reduce fossil fuel consumption and ...

DGStats will soon grow to include different types of renewable energy generation. "Behind-the-meter" facilities" energy generation can be used directly by the ...

In 2025, Idaho added 1,306 MWh of grid storage, catapulting the state up to 8th most installed storage capacity. Many storage projects are paired with solar and wind to provide reliable, low cost electricity ...

Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for ...

Learn how to generate solar energy at home and earn credits for the electricity you produce. Explore SCE's billing plans, rebates for battery storage, and ways to share solar benefits across accounts.

No, solar panels are not required for most SGIP budget categories. However, the new Residential Solar and Storage Equity budget specifically incentivizes combined solar and storage ...

National Grid has partnered with solar generation facilities to enroll community solar projects into the S-SFA program. Those enrolled solar generation facilities are paid for the electricity generated by those ...

If a solar professional determines that your roof is not suitable for solar, or you don't own your home, you can still benefit from solar energy. Community solar allows ...
