They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

Mini-Telecom Cabinets The Apollo Solar mini-cabinets provide all the electronics needed for smaller systems. Shown on the right: a mini-cabinet for a 500 watt ...

Featuring a high-efficiency HE 3 KW rectifier and an inverter for AC output, it ensures seamless power conversion. Managed by a DC air-con system and housed in a durable, aluminum electrostatic ...

Discover how a grid-connected photovoltaic inverter and battery system enhances telecom cabinet efficiency, reduces costs, and supports eco ...

Built with IP55-rated protection, it features integrated cooling, optional battery compartments, and solar controller support. This cabinet ensures continuous AC or DC power conversion and safe operation ...

The product is fully digitally designed with high reliability, high power density and high performance. The system adopts modular design and supports hot-swappable online maintenance.

These fully-integrated, galvanized units use DC primary power to charge a 12, 24 or 48 VDC sealed battery bank while powering the DC load, or AC load with ...

The Shoto smart power cabinet is a turnkey solution for powering communication base stations. It integrates multiple energy sources like solar, wind, grid, and batteries into a hybrid system. The ...

This cabinet can economically house a variety of next generation electronic equipment including telco backhaul, fiber distribution, and radio equipment for wireless applications.

Solar telecom integrated cabinet inverter solar power generation

The Apollo Series solar and hybrid energy solution delivers reliable and sustainable energy management for any telecom site incorporating solar and battery ...
