Various parties believe that solar thermal energy is still at too early a stage in the Netherlands or that it is not even feasible. At Novar, we don't believe in the impossible. We study new technologies and seek ...

Government targets are clear: by 2030, 70% of all Dutch electricity must come from renewable sources, from offshore and onshore wind turbines to ...

Renowned for its innovation and strong environmental consciousness, the country has become a leader in the adoption of solar thermal energy. This progress was showcased last year through two ...

Established in 2012, we are a National High-tech Enterprise with strong R& D strengths that integrates R& D, production, sales... Lees meer.

Sustainable Solution For More Than Thousands of Groningen Residents
New Technique Ecology About The Dredging Depot
This project contains a new technology. More than 24,000 solar collectors are used. The difference with "regular" collectors is that no electricity will be generated, but heat. Instead of cables, there is running water through the solar panels. The water heats up to 85 degrees Celsius on sunny days. A special high vacuum technique in the collectors... See more on novar

Larger systems over 500 kW accounted for just 6.9% of the total. By the end of 2018 private residential rooftop systems had an installed capacity of 2,307 MW, businesses rooftop systems 1,662 MW whilst solar parks amounted to 444 MW.

Groningen, a city in the Netherlands that traces its roots back to the eleventh century, is taking a modern approach to sustainably heating its homes and ...

Researchers at TNO, the Netherlands Organization for Applied Scientific Research, carried out the study and concluded that in 2050, solar heat would be a competitive standard technology for hot water and ...

When exploring the solar energy industry in the Netherlands, several key considerations come into play. The country has ambitious renewable energy targets, aiming for a significant share of its energy ...

The Dutch PV Portal has been created to provide publically accessible information on solar energy in the Netherlands, based on scientific research performed by ...
