---

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects ...

The U.S. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite ...

As the founder and moderator of the Energy Storage Exchange Club - a dynamic LinkedIn community of over 15,000 experts pioneering advancements in Battery Energy Storage Systems ...

The foundation of our analysis comes from the EIA 860M form, which requires developers to report all newly constructed power projects that are 1 MW or larger, as well as projects expected to come ...

According to the Q1 2025 US Energy Storage Monitor from Wood Mackenzie Power & Renewables and the American Clean Power Association ...

From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar and storage transition from the electric grid's fastest-growing additions to its ...

According to the report, U.S. storage will reach 87.8 GW by 2029, driven by residential and utility-scale segments amidst a constantly evolving policy environment.

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

# Total power of new energy storage projects

In Germany, TotalEnergies acquired KYON, a company specializing in the development of battery storage projects in that country, in 2024. The ...
