HyperCubeC& I: liquid-cooled outdoor cabinet for C& I--intrinsicly safe, up to 91% efficiency, plug-and-play install, scalable expansion.

Evaluating storage as a transmission asset allows network companies and planners to use energy storage's flexibility to resolve grid constraints by easing the transfer of power along critical corridors.

Transmission service provider NGCP has presented its 2024-2050 Transmission Development Plan (TDP) to various energy stakeholders during its recent annual nationwide public ...

A significant aspect of the NGCP's strategy involves the continuous expansion and reinforcement of key transmission backbones, particularly within the competitive renewable energy ...

Beyond 2030, the focus will be on extending the 500 kV transmission backbone from Nagsaag to Santiago and adding new 500 kV ...

This outdoor cabinet with built-in air conditioning and thermal insulation is engineered for reliable protection of critical electronic and electrical systems in extreme climates.

Key projects include developing a 500kV transmission system in Luzon for bulk power delivery to Metro Manila, reinforcing the 138kV Cebu-Negros-Panay ...

This outdoor energy storage system pairs 30kW PCS with 80kWh LFP batteries--ideal for peak shaving, emergency backup, and hybrid off-grid energy setups.

In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy

Transmission nodes use 80kWh outdoor energy storage cabinets from NorthPhilippines

resources. Scalable from ...

Exploring the role of energy storage as a transmission non-wires alternative in revolutionizing grid planning and infrastructure investments for a more dynamic electric grid.
