Huge battery storage plants could soon become a familiar sight across the UK, with hundreds of applications currently lodged with councils. In ...

Discover everything about the battery energy storage system UK. Learn benefits, case studies, and future prospects of UK battery energy storage ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. ...

Our Pembroke Battery is our UK flagship storage project and will make an important contribution to stabilising the UK energy market by efficiently ...

The UK's BESS capacity is set to triple by 2030. Discover how battery storage is crucial for decarbonization, grid stability, and long-duration storage.

We use cutting-edge lithium-ion battery technology for reliable performance and long lifespan. Our solutions range from small-scale 3.6kW battery storage to ...

BESS capture energy in times of low demand and provide almost instantaneous support to the National Grid at times of high demand. They do this by taking energy generated by renewable sources and ...

To make batteries, we need critical minerals such as lithium, cobalt, nickel, and graphite, which are being sourced or processed in the UK, from ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...
