As a tech-driven enterprise, we specialize in advanced transformers, solar energy storage systems, intelligent distribution networks, and hydrogen energy technologies.

It aims to (i) fully utilize fluctuating renewable power, otherwise to be curtailed, to reduce high carbon-intensive imported electricity from Siberia grid and restore the reserve margin for transmission ...

The power station has an installed generation capacity of 50 MW and storage capacity of 200 MWh. It is connected to the 220/110/35 kV Baganuur Substation on its southeastern side.

October 4, 2024: An agreement was announced last month to construct a 50MW battery storage power station in the Baganuur district of Ulaanbaatar, Mongolia, which is expected to be commissioned in ...

Special Significance: The black start capability provided by the Songino BESS adds a vital layer of resilience to Mongolia's Energy System infrastructure.

Mongolia first wind farm (55 MW) added a 10 MW/40 MWh battery system in 2023. This + storage combo provides \*8 hours of backup power\* to 22,000 homes during peak demand.

The proceeds will fund a new 50-megawatt Battery Energy Storage System (BESS) in Baganuur District, enhancing Mongolia's power supply reliability and supporting renewable energy ...

The BESS will be resilient to Mongolia's extremely cold climate and equipped with a battery energy management system enabling it to be charged ...

To prepare for the winter of 2024-2025, prevent electricity and heating shortages, and ensure uninterrupted power supply to consumers, an international open tender for the construction of ...
