The table below presents a list of sites that were previously certified under the Solar Stewardship Initiative but where the organisation has either left the SSI and/or decided not to renew its certification.

Agrivoltaics (also known as dual-use solar and agrisolar) pairs solar power generation with agriculture, generating energy and providing space for crops, grazing, and pollinator and native habitats beneath ...

Explore our latest map, charting the location of concentrating solar power plants across the country.

We deliver safe, reliable, and affordable clean energy through nuclear, solar, wind, and hydro projects across the Pacific Northwest. Explore innovation, sustainability, and career opportunities today.

This visualization shows wind and solar energy generation in the four Northwest states from 2000-2022. In the Northwest, wind energy generation has increased significantly more than solar energy ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Since USA was focused on research and development with regards to photovoltaics and concentrated solar power for a very long period of time thus has been one ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the ...

As a Washington state joint operating agency, Energy Northwest comprises 28 public power member utilities from across the state serving more than 1.5 million ratepayers.
