---

To address the inherent challenges of intermittent renewable energy generation, this paper proposes a comprehensive energy optimization strategy ...

Here, we demonstrate the potential of a globally interconnected solar-wind system to meet future electricity demands.

To address this challenge, this article proposes a coupled electricity-carbon market and wind-solar-storage complementary hybrid power generation ...

To help inform and evaluate the FlexPower concept, this report quantifies the temporal complementarity of pairs of colocated VRE (wind, solar, and hydropower) resources, based on their native generation ...

In this paper, we propose a source-load matching strategy based on wind-solar complementarity and the "one source with multiple loads" concept. ...

Renewable energy resources are abundant and developing rapidly in the power industry. This article establishes a wind-solar energy storage hybrid power generati.

In this paper, we analyse literature data to understand the role of wind-solar complementarity in future energy systems by evaluating its impact on variable renewable energy penetration, corresponding ...

Interprovincial interconnection further amplifies the benefits of wind-solar complementarity and reduces energy storage requirements. This study offers valuable insights into coordinated ...
