Maximize wind turbine performance with Heatex's complete and customizable cooling systems for generator, nacelle and converter/ transformer cooling.

Due to the rapid growth in unit capacity, the waste heat of wind turbine increases a lot. A more efficient cooling system is needed to timely discharge the heat to the environment, which is extremely ...

We support you with a variety of cooling systems and fanless designs for flexible integration into cabinets and rotating hubs. Our next-generation pitch controllers ...

The dry-type transformer is closer to one of the air vents, and the dry-type transformer can be cooled better through the arrangement, so that the problem of heat dissipation of the control...

Optimal cooling is a key factor in the efficiency, longevity and cost-effectiveness of wind turbines. Breuell und Hilgenfeldt offers customised, durable and intelligent solutions tailored to every requirement in ...

At AKG, we are proud to be a trusted partner in the wind power industry, offering cutting-edge cooling solutions that ensure the reliable and efficient operation of ...

Continental Fan is a leading supplier of wind turbine cooling fans for nacelle ventilation, GCU (generator control unit) cooling, cabinet cooling, and tower ...

This article delves into the importance of cooling fans in wind power control cabinets, the types of cooling fans available, their design considerations, installation and maintenance practices, ...

Air cooling systems use fans to circulate air around the components to dissipate heat, while liquid cooling systems use coolant to absorb heat and transfer it away from the components.
