We are committed to excellence in solar container and energy storage solutions. With complete control over our manufacturing process, we ensure the highest quality standards in every solar container ...

Spanning over 250 hectares, the plant features more than 250,000 photovoltaic panels equipped with anti-soiling coatings. Single-axis tracking systems follow the sun's movement, ...

The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load ...

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station ...

The project, billed as the largest grid-connected solar facility in Zambia and the biggest of its kind in sub-Saharan Africa outside South Africa, is ...

Zambia has officially signed a US\$100 million agreement for one of the largest standalone solar energy projects in Sub-Saharan Africa, outside ...

Construction of the first phase began in July 2024. A second phase, involving an additional 100 MW solar plant, is expected to commence soon. The project encompasses a 100-MW solar ...

Zambia's 100 MW solar plant in Chisamba marks a major milestone, powering mines and grid with \$71.5M investment, showcasing innovative clean energy development.
